performance

Turbo color is the most powerful and efficient LED lighting fixture you can find within the single head category. Using 60 high powerful LEDs RGBW/FC combined with an effective fan system, the key feature of the product is the incredible performance of the optics. The innovative optic system generates a rectangular and uniform light projection. The product is suitable for applications where a tremendous light output is required.

LESS

- less power consumption
- less dimension
- less warming
- less weight
- less waste

MORE

- + more performance of the optics
- more rating protection
- more light power
- more efficiency
- more reliability
